

Mohamed Ali Hassan

Backend .Net Developer

Mohamed.Ali.10722@gmail.com | +20 109 711 0295 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

.NET Developer with hands-on experience in designing, developing, and maintaining scalable web applications using ASP.NET Core, Web API, MVC, Entity Framework Core, and SQL Server. Experienced in healthcare, CRM, and insurance systems, with strong knowledge of software architecture, RESTful APIs, database design, authentication, and performance optimization. Passionate about building clean, maintainable, and business-focused solutions.

EXPERIENCE

FULL STACK .NET DEVELOPER | ASP.NET CORE WEB API DEVELOPER

TABIB SOFT – MEDICAL SOFTWARE SOLUTIONS

SEPTEMBER 2025 – PRESENT

- Developing and maintaining backend services and business modules using ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, and SQL Server.
 - Designing scalable application architectures, implementing business requirements, and optimizing database performance.
 - Contributing to healthcare, CRM, insurance, and contract management systems serving multiple organizations.
 - Developing secure and maintainable solutions, including database integrations, reporting features, and workflow automation.
 - Writing optimized SQL queries, stored procedures, and data access layers to support business-critical operations.
 - Diagnosing and resolving production issues while continuously improving system performance and reliability.
-

TECHNICAL SKILLS

- **Backend:**
ASP.NET Core, ASP.NET Core Web API, ASP.NET Core MVC, Entity Framework Core, LINQ, REST APIs
- **Authentication:**
JWT Authentication, Authentication & Authorization
- **Programming:**
C#, JavaScript
- **Frontend:**
HTML, CSS, JavaScript, ReactJS(Basics)
- **Database:**
SQL Server
- **Tools:**
Git, GitHub, Postman, Swagger Docker(Basics)
- **Architecture & Design:**
Clean Architecture, N-Tier Architecture, Repository Pattern

PROJECTS

Task Management System – ASP.NET Core Web API

- Developed a RESTful API for managing and tracking team tasks within a software development workflow.
- Implemented JWT-based authentication and authorization to secure API endpoints.
- Designed a KPI-based employee evaluation module allowing managers to assess developers using configurable KPI checklists and scoring.
- Built a task review workflow where testers can return tasks with issue checklists and evaluation scores.
- Integrated Firebase Cloud Messaging (FCM) to send real-time notifications to users when tasks are assigned, updated, or reviewed.
- Implemented PDF activity reports generation for user sessions and system activities.
- Used Entity Framework Core and LINQ for efficient database operations.
- Designed and managed relational database schemas using SQL Server.
- Deployed SQL Server database to MonsterASP hosting environment and configured remote connection with the ASP.NET Core API.
- Live Demo: [Website](#), [APP](#), [GitHub Repo](#)

E-Commerce System API

- Developed a scalable E-Commerce RESTful API using ASP.NET Core Web API following Clean Architecture and N-Tier Architecture principles.
- Implemented Repository Pattern and Dependency Injection to ensure maintainable and loosely coupled code.
- Built modules for product management, categories, authentication, orders, cart, and user management.
- Designed and managed SQL Server database with Entity Framework Core and optimized database queries.
- Implemented JWT Authentication and role-based authorization for secure access control.
- Applied clean code practices and separated business logic, data access, and presentation layers for better scalability and maintainability. [GitHub Repo](#)

Book Store Website – HTML, CSS, JavaScript

- Developed a responsive book store website UI for browsing and exploring books.
- Designed interactive pages using HTML, CSS, and JavaScript.
- Implemented dynamic features such as book listing, search, and category filtering.
- Focused on responsive design and user-friendly navigation for different screen sizes.

CERTIFICATIONS

React Web Developer Intern – Digital Egypt Pioneers Initiative (DEPI) | (April - October 2024)

- Completed 164 hours of training in modern web development technologies.
- Built web applications using React.js, HTML, CSS, and JavaScript.
- Used Git & GitHub for version control and collaborative development.
- Learned cloud computing, Docker containers.
- Developed a full-stack project applying modern development practices.

EDUCATION

- **Bachelor of Science in Computer Science**
- Faculty of Science, Menoufia University
- Graduation Year: 2025

SOFT SKILLS

- | | |
|----------------------|-----------------------|
| • Communication | • Analytical Thinking |
| • Problem Solving | • Time Management |
| • Team Collaboration | |

LANGUAGE

- | | |
|------------------|---------------------------------|
| • Arabic: Native | • English: Intermediate (B1-B2) |
|------------------|---------------------------------|

PERSONAL INFORMATION

- Military Status: Exempted.
